Sequelize
Neo4j
Cypher
Git
Mocha/Chai
Illustrator
Indesign
Photoshop

Education

Certificate, Full-Stack Software Development
Fullstack Academy of Code
2018

Bachelor's of Art, Anthropology
University of Florida
2007

Interests

Oyster shucking
Writing
Local exploration
Fine dining
Butchery
Farmers markets
Fashion
Typography
Pop-culture
French
Spanish
Modern art

Projects

Developer, Code Map
July 2018 | Fullstack Academy, Chicago, IL

code-map.herokuapp.com

-Imagined and constructed a learning and organizational website for coding resources from start to finish with a team of four over the course of two weeks using agile development
-Built with Node, Express, and Neo4J on the backend, with React and Redux on the frontend
-Learned Neo4J, a graph database, and Cypher Query Language for the project
-Taking advantage of the strengths of graph databases, I co-architected our data to expose the relationships between our users and their preferred learning resources. We used this data to power a recommendation engine, and discover the optimal sequencing of resources
-Developed modular fuzzy-matching search functionality, recommendation algorithm, and several user-facing verticals from Express routes to React components

Developer, Candy Crushers
June 2018 | Fullstack Academy, Chicago, IL

candy-crushers.herokuapp.com

-Created an e-commerce site for selling candy with a team of three using agile development
-Developed strategy for managing user shopping cart using a combination of local storage and traditional database storage to maintain persistence from device to device, through reloads, and logging in and out of personal accounts
-Implemented third-party log-in with Google OAuth
-Designed the look and feel of the user interface, and constructed custom photo carousels for elegant product display
-Built with Node, Express, and Sequelize on the backend, and React and Redux on the front end

Sole Developer, Words in Motion
June 2018 | Fullstack Academy, Chicago, IL

youtu.be/kLjX4C3Tj-M

-A whimsical animation of the Oxford English Dictionary using pure CSS and Create React App
-Explored communication and usability with motion in UX design with CSS transitions and keyframes
-Awards: Winner of Fullstack Hackathon, UX Design

Experience

Teaching Fellow
July - October 2018 | Fullstack Academy of Code, Chicago, IL

-Taught full-stack Javascript web development to students in beginner through advanced levels
-Assigned to a team of four students to guide and mentor through their jr phase. Graded all tests and projects, conducted office hours, and provided tutoring to students who were struggling
-Project manager to four teams of students in the senior phase; guided teams on project development, interpersonal interaction, advised on major code architecture and on code reviews
-Interviewed potential candidates through pair programming problems and behavioral questions to assess candidates' fit for Fullstack Academy's immersive program

Pizzaiolo & Line-Cook
January - December 2016 | Del Popolo, San Francisco, CA

-Involved in the highly technical and detail oriented process of creating authentic Neapolitan Pizza from scratch with a team of four pizzaiolos
-Awarded a spot on both Eater San Francisco's Top 38 and the San Francisco Chronicle's Top 100 Restaurants, as well as a Bib Gourmand from Michelin

Prep Supervisor & Line-Cook
June 2015 - June 2016 | Tosca Cafe, San Francisco, CA

-Supervised production staff of ten
-In charge of daily ordering, keeping inventory, and quality control
-Worked in a high-intensity, high-volume, fast-paced environment where teamwork and effective direct communication were paramount in order to cook for 100+ tables every evening
